

Smokefree Casinos Are A Safer Bet

It is not safe to breathe any secondhand smoke.¹
No air filtering system can get rid of it.²

Did you know?

91%

of California adults do not smoke.³

75%

of American adults prefer smokefree casinos.⁴

*In our every deliberation,
we must consider
the impact of our
decisions on the next
seven generations.*

Haudenosaunee Confederacy

Smokefree air is good for health and business

Tribal casinos made changes to protect everyone's health and safety during COVID-19.

Having a smokefree policy:

Protects everyone from secondhand smoke

Reduces employee absences

Protects against possible liability

Reduces cleaning costs

Thirdhand smoke is the toxic tobacco pollution that stays in the air and on surfaces such as carpets, slot machines, card tables, and walls, after smoking has stopped.⁵

Communities Addressing Nicotine (CAN) offers help with:

- Air Monitoring
- Marketing Surveys
- Media Recognition
- Policy Development
- California Clean Air Awards

Contact Communities Addressing Nicotine (CAN) to develop and implement a smokefree policy. CAN provides scientific, market, and public opinion research to help Tribes make informed decisions about casino smoking policies.
